

Project Discussion Instructions

Project discussion instructions:

- Each team must be ready to present his project to the attendees in 10 minutes in the manner they deem appropriate – ***power point presentation is not obligatory.***
- ***One member from each team is enough to present the project.*** This does not mean that it is the individual who carried out the project alone, but only he is the person who has the best presentation skills in the team.
- It is widely required from each team to bring ***two copies from their project in two different laptops.***
- After the presentation, each team member will be discussed and evaluated in his work individually.
- Be sure, your effort will be considered even though you did not reach to the required result. Only what is required from you is to do your best.
- You must document your work as specified below. Documentations will be evaluated.
- Each team must deliver the project and the documentation on a covered CD.
- Teams who plagiarize will be subject to penalties
- Kindly, fill the course evaluation form and deliver it with your documentation. Course evaluation is required individually from each student. Your evaluation will contribute the course improvement.

Documentation instructions:

1. Cover page which has the project title and the team members' names and IDs.
2. Project specification:
 - a. Project general description.
 - b. Project functionalities, you may need to include some screen shots.
3. Project design and implementation:
 - a. Design phase – the proposed design to implement the project functionalities.
 - b. Used tools, imported libraries, designed algorithms.
 - c. The detailed code is not required to be included.
 - d. The tasks which are assigned to each team member.
4. Your project contribution.

Do you your best, hope for you best wishes
